SALES, INCENTIVE PAYMENTS AND PRICES FOR TEXAS WOOL,
1959 MARKETING YEAR

Houston E. Smith, Junior Economist
Department of Agricultural Economics and Sociology

The shorn wool incentive price is established under provisions of the National Wool Act of 1954, which directs the Secretary of Agriculture to determine a support price that will encourage an annual production of 300 million pounds of shorn wool. The act also restricts payments to 70 percent of the duties collected on imports of wool and wool manufacture since January 1, 1953.

The incentive level for the 1959 marketing year (April 1, 1959-March 31, 1960) was set at 62 cents per pound for shorn wool, the same level as set for the 4 previous years of the program. It is 88 percent of the 1959 parity price of 70.5 cents.

Gross incentive payments to Texas producers in 1959 totaled \$8,814,073.82. This represents a 43.2 percent increase of the gross proceeds received by Texas producers after marketing costs have been deducted. It is less than the total for 1958 marketing year because of the higher average price received and the smaller poundage marketed.

The State office of Agricultural Stabilization and Conservation certified 19,653 applications for incentive payments on 45,664,301 pounds of shorn wool. The State ASC gross incentive payment was \$8,814,073.82 from which was deducted \$456,643.01 for sales promotion for lamb and wool, leaving a net incentive payment of \$8,357,430.81. The deduction was paid directly to the American Sheep Producers Council, Inc.

The 19,653 applications certified for payment on shorn wool marketed were received from 231 of the 254 counties in Texas. Application ranged from one to a county to 1,028 per county, the average number of applications per county was 85. Fourteen counties filed one application each, 101 counties filed less than 25 applications each and 23 counties filed no applications.

Pounds of grease wool marketed average 197,681 pounds per county. The poundage per county ranged from slightly less than 100 pounds to an excess of three and a quarter million pounds. Sixteen counties marketed in excess of a million pounds, 16 counties marketed from one-half to one million pounds and 28 counties marketed from 100 thousand to one-half million pounds. Fourteen counties marketed from 50 thousand to 100 thousand pounds and 157 counties marketed less than 50 thousand to 100 thousand pounds and 157 counties marketed less than 50 thousand pounds each. Even though shorn wool was marketed in 231 counties, the bulk of clip was marketed in 88 counties.

The average number of pounds marketed per producer was 2,324 pounds. Pounds marketed per producer ranged from less than 100 pounds to slightly more than 24,000 pounds.

The average price received for the 1959 Texas shorn wool, grease basis was 44.7 cents per pound, 1.4 cents above the national average. The average price received for shorn wool, grease basis, plus the net incentive payment was 63.0 cents per pound. Price per pound for Texas shorn wool, grease basis ranged from a low of 21.2 cents to a high of 53.5 cents, a 32.3 cent spread. The range in price per pound grease basis plus the incentive payment was from 29.4 cents to 75.3 cents.

There were 27 counties which marketed in excess of 50,000 pounds of shorn wool and received 62.0 cents or more per pound, incentive payment included. There were 16 counties which marketed less than 50,000 pounds of shorn wool and received 62.0 cents or more per pound, incentive payment included.

A summary of the initial 5 years of the wool incentive program for Texas is shown in Table 1. Table 2 shows the incentive payment rates, total gross and net incentive payments and the total amount and percent of the contributions made by the Texas wool producers to the ASPC Inc. for the years the incentive program has been in force. The sales incentive payments and prices for Texas wool by counties for the marketing year 1959 are shown in Table 3.

Year	Counties	Number	Applications	Number	Pounds	Total amount net grease wool on which incentive payments were made	Average amount of grease wool per application	Pounds
